

# cupc highlights

may 15, 2020

*We hope everyone is staying safe and that you and yours are healthy. We also hope that you're feeling ready for some **good news** from CUPC affiliates. Remember to write if you've recently had manuscripts accepted, media coverage, or any other accomplishments! ~ Anni*

## CUPC baby boom

Amanda Stevenson and Tim Chilcott welcomed Wells Stevenson Chilcott on May 4th. Everyone is home and recovering well ... and rumor has it that but 30 minutes later, Ryan Masters and Teal welcomed Margaret Lynne Masters (Maggie).

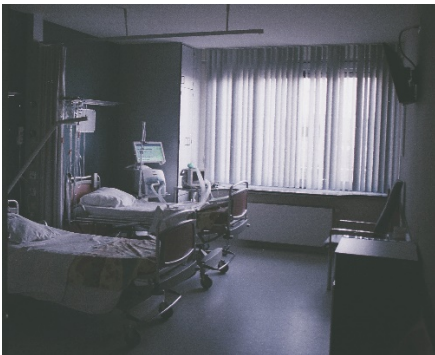

*Congratulations everyone!*

## awards

Applause! Applause! **Jason Boardman** is the recipient of this year's [Clifford C. Clogg Award](#) from the Population Association of America, awarded biennially for the mid-career achievement in the field of demography! Here is a wonderful video that captures it all: <https://www.youtube.com/watch?v=98YQoDpLtw8&feature=youtu.be>

## COVID-19 media

To curb the risk of spreading the coronavirus, hospitals nationwide are banning visits from family and friends, which can result in quite a lonely death. Sociology PhD candidate **Aubrey Limburg** and CU-Denver professor **Karen Lutfey Spencer**, coauthored an op-ed, featured in *The Society Pages* May 5, titled [It's true. Isolated COVID-19 deaths are terrible. But where does inequality fit in?](#), which provides an interesting perspective on how "people whose socioeconomic resources normally help them gain traction for maximizing their health are now in a position, *just like disadvantaged groups are normally*, where they cannot do that."

## forthcoming published paper

["Healthier Than Just Healthy': Families Transmitting Health as Cultural Capital"](#) coauthored by **Stefanie Mollborn**, Bethany Rigles (CSU), and Jennifer A. Pace (Midwestern State) was recently published online in *Social Problems*.

## invited participation

Postdoc **David Braudt** was accepted to be a participant in the [2020 Butler-Williams Scholars Program](#) hosted by NIA this coming July. This *highly selective* 5-day program provides unique opportunities and insight for emerging scholars, new to

the field of Aging. Besides lectures, seminars, and small group discussions, the program also offers mentorship by NIA program officers in preparing research proposals. *Bravo David!*

### *dissertation defense*

**Miriam Counterman** conquered the challenging pandemic circumstances and successfully defended her dissertation, "Food security, labor migration, and natural resource use in rural South Africa". *Way to go Miriam!*

### *CUPC proposal submission*

CU PI: **Fernando Riosmena**

Lead Collaborator: Emory University (Solveig Argeseanu)

Project Title: Disparities in the burden and progression of multi-morbidity across adulthood

Funding Agency: NIH National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) R01

CU Amount Requested: \$57,744
